

Little Black Book: Shellie Goldstein Acupuncture Centre

July 7, 2013

By: Jamie Roy

The one stop shop for health and beauty, Shellie Goldstein Acupuncture in New York City have a little secret I'm going to share with you. Behind the doors of the intimate office in the Flatiron District, is world renown facialist Georgia Louise. Hailing from London, where you can find her part time in her own spa on Beauchamp Street in Knightsbridge, Georgia is known for her holistic healing, bespoke treatments that famous faces such as Linda Evangelista, Emma Stone, Cameron Diaz, Mario Testino and Shalom

Harlow can attest to. What's more, is that she's just developed a line of skincare products made in her very own kitchen ... well, up until the demand for them became too great!

I recently had a facial with Georgia who transformed my dull, sallow skin into a ray of light using vanilla infused oxygen (can't you just smell the sweetness now), masks, lotions and organic tonics. The results were so dramatic and long lasting that I can hardly believe my eyes. Now tell me this is something you can resist!

Her signature facials range from £238-£400 with a slew of other options on the menu like CACI non-surgical face lift, derma roller collagen therapy, fruit enzyme treatments, chemical peels, microdermabrasion and LED light therapy. Click on for photos and more details!
